# **Product Data Sheet**

#### **Features**

- Pumps abrasive slurries, corrosive material, solids and gaseous liquids with ease
- Ideal for high viscosity or shear sensitive products
- Pumps can run-dry indefinitely without damage
- No check valves or seal water flush systems
- Fully reversible pumps in either direction
- Minimal maintenance the hose is the only wearing part
- Pump casings available in a choice of materials including stainless steel
- Suction lift capability up to 9.5 metres and self-priming
- Highly accurate

# **Technical Specifications**

Maximum intermittent flow rate of: 147,000 litres per hour Maximum continuous flow rate of: 105,000 litres per hour

Flow per revolution of: 70 litres
Pressure capability of: 7.5 Bar

Maximum temperature: 80 Degrees Celsius

Inner hose diameter of: 150 mm

# **Technical Specifications**

Operating Speeds: 0 to 35rpm

Product Temperature Range: -10 °C to +80 °C Suction Lift: 9.5 metres lift

Hose Materials: Natural Rubber, Nitrile (Buna), EPDM and CSM

Connections available: BSP, NPT, DIN, ASA, Groove End: 316 St. Stl., PVC

Hose Lubricant Required: 110 litres

Sound level at 1m: < 70 dB(A) (pumping water at maximum continuous flow)

Optional Hose Failure Sensor: Capacitive DC sensor

# **Materials of Construction**

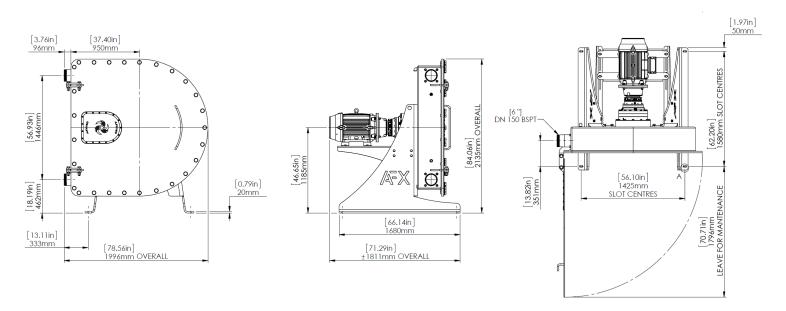

Pump housing: Carbon steel or stainless steel

Rotor: Carbon steel

Compression rollers: Aluminium or steel

Front cover: Carbon steel or stainless steel
Support Frame: Carbon steel or stainless steel

Seals: Neoprene or Nitrile

### Approximate Weight 2,560kgs

Actual weight depends upon drive fitted. Contact factory for details.

The information contained in this document is believed to be correct but neither AFX Holdings nor its subsidiary companies or distributors or representatives accept any liability for any errors or omissions and reserves the right to alter any specifications without notice. All values given in this document are values under controlled test conditions. Actual site flow rates achieved may differ due to changes in temperature, product viscosity, suction and discharge pressures and/or system configuration.
